Hongkons, July 17TH. 1890.

THE Bill to amend the Law relating Fraudulent Marks on Merchandise was read | dead in his borth early vesterday morning. He a second time at the meeting of the Legisla. tive Council on Monday. The members of . Council, both official and unofficial seemed A fatal assident happened to Koo Ching, aged meeting of the P. & O. Company held on the to regard the measure as one of some impor- Company, on Tuesday evening. The deseased was gratifying both to himself and his hearers. In the Club. He may rest assured that in his temwho has gone to the trouble of criticising the delate in a letter to a contemporary, Tung Wa Hospital, but died early yesterday any time or at any length, but perhaps before I treats it seriously. But as a matter of fact morning. the Bill is a mere sham and pretence. ciple, and he said he thought every member of Council who read through the Bill careto have such an Act no one will be found to *and we have been unable as yet to learn in what respect the new Act is an improvebe re-cast, well and good, but to introduce the Bill with a flourish of trumpets as some thing new, or as introducing any new principle, is absurd In moving the second reading the Hon. E. J. ACKROYD, Acting Attorney-General, said it was framed on the Imperial Act, and aft r referring to the very that it Japan was the with consciously in the were required to besitute as to the payment of numbers were not very large, yet the interest August and the other in October, 1880. But be referred by attack on the American missionary at Tokyo who the interim dividend upon the basis none and which was shown by those who took installments were paid through Mr. Evens. H. the English Act, principal among which is the prevention of the importation of fraudulently marked goods, he said there was a clause clause containing such a prohibition, but is efficient machinery provided for preventinto the country, whereas in the local Bill

fourteenth section everything will go on as, before. If any action at all is taken it has to be initiated by private individuals, who will have to dive security and render themselves responsible for all the costs of a possible law suit. No one is likely to incur this efforts of Representative Merrow. The most imresponsibility unless his own interests are immediately threatened, and in that case he could take action just as effectively under the existing Ordinance.

tion in saying in reply to Mr. MacEwan's question in Council yesterday that goods coming into this colony with the words in English on them 'Superfine Cloth' will require to have added, in English, a statement that they are-of German manufacture, unless the vendor wishes to be prosecuted under the new Ordinance and have his goods forfeited to the Crown. Iron manufactured in stated that it is of Swedish manufacture." Cloth made in Germany and bearing the words "superfine cloth." he says will also require to have the name of the country of origin stamped upon them, because English words on goods is a yery fair indication of nationality and have been held to be so." The learned gentleman's statement of the law is no doubt correct, but the importation of Swedish iron marked "Lanca-English stamps will be no more punishable under the new Ordinance than under the old one, and the importers of the goods OUR ARRATED WATER MANUFACTORY mentioned, bearing marks which have the Tuesday evening, when despite the heat, there ing permission from the native Christians to replete with the best 'Machinery, embodying sanction of long usage, or of other and unmistakably fraudulent goods, need be under to no apprehension. There is not the remotest probability of the goods being discovered until they are in some way offered or exposa hed for sale; and then their position is just Ordinance it is an offence to expose or exhibit The purest ingredients only are used, and any article on which shall have been put "any false description, statement, or other indication of or respecting the number,

We continue to supply large bottles as quantity, measure, or weight chattel or article shall have been made, manufactured, or produced." As to the clause prohibiting importation Mr. Francis says:-It seems to me a very great pity to introduce into this useful Ordinance clause 14, there being absolutely no machinery in the Colony for giving effect to it. It would be much better omitted. The other clauses afford protection enough." Do they? They afford no more protection than the clauses of the old Ordinance, and how little that amounts to is well known. Fear of the light that it was thought might be turned on to certain branches of trade if the Registration of Imports and Exports Bill had become law was the incentive to a not inconsiderable section of the opposition to that measure. With a law requiring the registration of imports it might perhaps be possible to some xtent to carry into effect clause 14 of the Merchandise Marks Bill, but under existing conditions the clause must of necessity remain a dead letter. To proved so useful in England and hids fair to prove equally useful in India is absurd and in fact hardly honest, for the maker of an-

Ordinance who holds it out as something of journeying to and from the capital were abun- socially, this energy and resource in the prodifferent from what it is is not in much better dantly rewarded. The passages read were, motion of manly, healthy recreation, are incase than the man who sells goods which do firstly, a richly descriptive passage based on exhaustible. He is full of consideration for not agree with their description. If the Government has any real desire to put a secondly, a meeting between Pon'ins Pilate S. rvice to which he has the honour to also. You'll find matrimony is much enstop to the introduction of fraudulently marked goods into the Colony it had better try again. Perhaps it might be able to get some useful assistance from the Board of The interim dividend to be usid by the Hongkong Land Investment Company, Limited, is to be at the rate of 10 per cent., instead of 8 per cent. as first announced. .. We are indebted to the Spinish Consul for copy of the following telegram received by him direction N. 1 N.W. Sergeant Euanson of the Hungkong Police | work will be brought out simultaneously in Lon- and perfectly dressed clingsby Bethell, whose

SCIENTIFIC MISCELLANY

The buman voice alone, writes Mr. J

lobotham, is capable of printing form upon

matter as successfully and as distinctly as a violin bow drawn across the edges of a plate:

The discoverer of this great fact is a lady. Mrs Watta Hughes. The experiments are conducted a follows: A hollow receiver is procured, over the mouth of which is stretched an elastic membrane. The surface of the membrane is covered with a semi-fluid paste, of such consistency that very light impressions can be easily received. The vocalist then sings against the membrane with perfectly stendy and accurate intonation. when the musical note mirrors its if abon the paste, and in the most unexpected forms. Disies. with every petal exactly shaped, are common figures; lilies, as symmetrically made, are no rars. A change of note, or of timbre, will proluce a miniature tree upon the paste. By some dight variation, impossible to estimate, the figure of a star fish will appear on the surface of the membrane; another imperceptible difference of sound will lay side by side with the star fish, an anamone. Occasionally the vibrations will imprint themselves in the form of shells, beautifully voluted, then, deserting these marine forms as capricionaly as it took them up, the sound will create ferne, suspend bunches of fruit, and otherwise adorn the sur-

A new building material known as zylolithe being introduced by some Drasden manuacturers. It is composed of a mixture of sawinst and certain oh micals, and is formed into lates under great pressure. Without losing he property of wood, it possesses the hardness d atone, and is practically fireproof, a threeach cube having failed to take fire or he inrnally affected when heated in an even—even to dness-for five hours.

A scheme for testing the various kinds of life. boats by manual of models of rodge of size has bean proposed by Mr. J. Corthell, an English naval architect who has speat twenty years in concerning the chief types of beats now in use By his plan an ordinary salf-nichting trobust, sented by a model 143 feet long and 31 feet wide, weighing about 500 pounds. The cost of half a dozen such models, representing the most important and diverse forms of lifebouts, would be about \$1,973, and \$50) more would remunerate the crows. Mr. Cortall conclude that in this way, at half the cost of a single lifeboat result in improvements in future lifeboats of incalculable value.

It appears that mesmerism—which in the last few years has been revived under the name of hypnotism—was studied by scientific men nearly half a century ago, and that its value in surgery was then demonstrated. In 1846 a medical commission was appointed by the Government of Bengal to report upon the painless surgery practiced by Dr. James Esdaile, and in the course of the investigations many parsons were successfully operated upon amoutations being made and tumors removed while the patients were in a state of utter unconsciousness through the mesmeric influence.

· A unique specimen has been received by the enatomical museum of Rome in the form of the body of Joseph Catonic, the famous Italian ciant. Catonio was made porter to King Louis Philippe in 1845, when he was described as being 74 feet full and as wearing a waist-belt apable of serving as a belly-band for a good-

Lead-poisoning among Jacquard weavers in a wins factory has been traced to dust from leaden weights used to carry the thread of the warp. Even in our day thoughtless people might be inclined to deride a quiet Quaker dressed in a scarlet suit, although colour-blindness—which so lour escaped the notice even of its subjects—is beginning to be recognised as a quite common defect. The first recorded case of the inability to distinguish differences of colour, according to a late Hoval Institution lecture, was ascribed to Dr. Priestley in 1777, and was that of a man named Harris, a shoemaker, who had also a clourlind brother, a mariner. Soon afterwards, thecase of Dalton, the chemist, was fully described and led to the discovery of other examples of a similar kind. The condition was still, however, noked anon as a very exceptional one. It has only been shown within the last few years, by extensive investigations both in Europe and in America, that those which may be called the common forms of colour blindness, the blindness to red and to green, exist in about four per cent A new atilization of a waste product is the of the male population, and in parhaps one per naking of a valuable paste on effective sub- thousand of females. Among the rest there are titute for gum arabic-from the straw boilings slight differences of colour-sense, partly due to that accumulate in the manufacture of paper differences of habit and training, but of little or no practical importance. Many who are not A good imitation of silk is produced from colour-blind are surprisingly colour-ignorant, seedemicals by M. de Chardonnet, but the product ing colours perfectly but being unable to name not the real article, which other French even the most common—though he would be a themists have sought to prepare by artificial colour-wise person indeed who could name or even urans. Ever since 1865 M. Emile Blancherd distinguish all colours, no less than 2,000 different ins laboured to produce genuine silk in the ones having been displayed and named on

> The electrical range-finder is designed for us n naval warfare, but, if it proves successful should be of great value in times, of peace as in instrument for readily and accurately anding the distance of inaccessible objects Two teles. copes are used at a known distance spark and be operation is based upon the fact that by a simple electrical arrangement no current with pass unless the two telescopes are exactly arallel. The observer notes on one of the telescopes the angle required to prevent a carrent from passing through the instrument, and and thus measures or electrically weighs the difference in angle of the two.

NOW ON SALE. imperial quarto. PNGLISH AND CHINESE DICTIONARY. WITH THE PUNTI AND MANDARIN

PRONUNCIATION. An Anglo-Chinese Dictionary, published at the Daily Press Office, Hongkong. For comprehensiveness and practical service this Work stan is unrivalled. All the new words which the Chinese have of late years been compelled to coin to express the numerous objects in machinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are here given in extenso. Each and every word is fully illustrated and explained, forming exorcises 1545 for students of a most instructive nature. Both the Court and Punti pronunciations are given the accents being esrefully marked on the best principle hitherto attained. The typography displays the success of an attempt to make the Chinese and English type correspond in the size of body, thereby effecting a yest economy o space, achieving a clearness not previously attained, and dispensing with those vast margins. and vacant spaces which have heretofore characterized Chinese publications.

To illustrate the vast scope of the work the following facts are submitted for consideration: Chalmers' Vocabulary contains about 16,000 Chinese characters, and Medhurst's English and Chinese Dictionary about 100,000, whilst this work contains more than 50:000 English words, and upwards of 600,000 Chinese characters. Again, despite all the grammars and other elementary works as yet published the student of this difficult language absolutely requires examples to display the various appli-cations and equivalents of different words which have one general meaning. Of these examples this work contains more than five times as many as any other Dictionary hitheric, pub-For practical purposes the arrangement of the work is so complete, that a reference to its pages onables a person who understands English to communicate effectively will natives who understand nothing but Chinese. In this respect the work will be found indispensable to all

Europeans residing in China, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted. o parties resident in England and interested in China it cannot but be invaluable occasion It comprises upwards of two thousand large
